RISKS AND REWARDS OF ENTREPRENEURSHIP

Entrepreneurship is the act of creating a business or businesses while bearing all the risks with the hope of making a profit. It is one of the resources economists categorize as integral to production. Entrepreneurs create a business plan, hire labor, acquire resources and financing, and provide leadership and management for the business.

Seems a little too easy on paper, doesn't it? Running a business frequently comes with potential risks and failures as a part of the journey. However, it can sow a myriad of rewards as well. Let's discuss the boon and bane of entrepreneurship.

Successful entrepreneurs are seldom willing to sit in their comfort zone and not think out of the box. Taking risks, facing failures, sleepless nights and a spark of zest is what keeps an entrepreneur busy with what they love. They understand a great deal of risks that are involved while setting out the business plan. The biggest fear of entrepreneurship is the cash flow. Getting sponsors, marketing, publicity - everything requires money in order to start a business. There is no security of a steady salary at the end of the month. Burning the midnight oil is the way to initially start a success story.

The mainstream markets where every entrepreneur is trying to sell their product can increase the competitiveness amongst themselves. New ideas come up everyday and are often rejected by the society as they fail to come up with a better alternative. Entrepreneurs are often ready for a rollercoaster of emotions. The feeling of rejection, having self-doubts, not giving enough time to oneself or the families, the immense pressure of failing over and over again can become scary at one point as well. Entrepreneurs should expect to make some mistakes, some of which will be costly. However, with the right planning, funding, and flexibility, businesses have a better chance of succeeding. Like every coin has two sides, there comes a sea of benefits that are associated with entrepreneurship.

Firstly, you are your own boss. Leadership, strategic thinking, passion that drives you to do something from scratch are some of the best benefits any entrepreneur can impersonate. Starting a business means turning a vision into a reality, and that can be intensely fulfilling. Furthermore, the connections an entrepreneur makes while building his business is massive. Getting to know more and more people in the industry is only an addition to a book of better business. One also has the freedom to choose if you want to work from home or while traveling and you can choose when you want to work.

You learn how to face rejections, overcome a number of challenges among various other skills that include being more creative, practical and much more. Most importantly it improves the standard of living and a sense of self satisfaction of finally making it to the end. The satisfaction of dealing with tremendous turmoil and hurdles throughout the journey of self making oneself. The satisfaction of reaping the results of years of hard work you put into.

2. Instagram post for E-CELL informing about an event:

Round 1

- Exhibit your talent and knowledge to make your mark in the compelling quiz
- A quick buzz round fetches you points
- Usage of phones not permitted
- It's not going to be subtle
- Be ready for twists and turns coming your way, be attentive to win big

Round 2

- Top 12 teams will qualify for the last round
- Showcase your analysing and adept talents to acquire as much information as possible
- Trade correctly, faster and efficiently to gain maximum profit!

3. Whatsapp forward for an event in CSI:

 The most awaited 'Git For Geeks: Second Commit' workshop is finally here, and this time its OFFLINE!!  

A hands-on session based on GitHub that will shed light on the workings of Git and how to demonstrate our work on this vast platform. Here are the details:

 02 November, 2022

 02:00 pm - 05:00 pm

 Seminar Hall, 3rd Floor

Get experienced and have myriad of benefits 

Here's an opportunity to showcase your projects and add substantive links to your CV's and Resumes and get a wider acceptance.

So what are you waiting for!
